

Medanta Institute of Education and Research

Date: 26th December 2018

To

Prof. Aditya Malik
Vice Chancellor
K.R. Mangalam University
Sohna Road, Gurugram
Haryana 122103

Subject: Letter of Intent – reg.

Dear Prof. Malik,

Medanta Institute of Education & Research ("MIER") is a trust established with the object of supporting and promoting educational and research activities.

This letter has reference to various discussions regarding our collaboration for implementing the common objective of developing well-trained and high quality human resources by initiating and offering undergraduate degree programme in nursing titled 'B.Sc. (Nursing) – 4 Years' to the students of the University or such other education program/ services as may be mutually agreed between the parties ("Training Program")

The Training Program shall be conducted by the parties on such terms and conditions as may be mutually agreed in a separate definitive agreement.

The parties acknowledge and agree that this letter will not be construed in any manner to be an obligation to enter into a contract or to result in any claim whatsoever by either party against the other party for reimbursement of cost for any effort expended.

MIER and the University hereby acknowledge that this letter sets forth their understanding/ arrangement with respect to the aforementioned and as evidence of their acceptance MIER and the University hereby execute this letter.

Report on

Anaemia Mukh Haryana Follow Up-1

Date: Tuesday, 29th August 2023

Venue: OPD Physiotherapy, K.R. Mangalam University.

Event Type: Anaemia Screening

Mode of Activity: Offline

Target Group: Girls students / female faculty

Resource Person (if any): Dr. Neha Dagar, Medanta Hospital

Coordinators: Dr. Sunil Kumar

Organized by: Health Society KRMU

Number of Participants: 60

Introduction:-

Health Society of K. R. Mangalam University in collaboration with Medanta Institute of Education & Research is conducted a public health project (Anemia Mukh Haryana) in coordination with CMO Gurugram at OPD Physiotherapy K. R. Mangalam University.

Objectives:

The key objective of this project is to conduct screening of Anemia & to evaluate the acceptance of intervention among anaemic female – adolescent, pregnant and lactating women.

Content:

Health Society of K.R. Mangalam University in collaboration with Medanta Institute of Education & Research conducted a public health project (Anemia Mukh Haryana) in coordination with CMO Gurugram at OPD Physiotherapy K. R. Mangalam University. Dr. Neha Dagar was started the screening of Hemoglobin for Girls students, female faculty of KRMU.

Conclusion:

Anemia during adolescence influences women's entire life cycle since anemic girls will have lower pre-pregnancy iron stores. Investing in preventing anemia during adolescence is critical for adolescent girls themselves as well as for the survival, growth and development of their children later in life.

Registrar

K.R. Mangalam University
Sohna Road, Gurugram, (Haryana)

Detecting and treating anemia in time - with results obtained on-site -can make a huge difference. With access to accurate anemia screening tools, you can more easily detect those at risk.

Further Scope:

1. To bring to attention of program managers of health and health related activities the serious negative consequences of anemia for the health and physical, mental, and economic productivity of individuals and populations
2. To layout IFA supplementation protocols across the life cycle (preventive strategy)
3. To define a minimum standard treatment protocol for facility-based management of mild, moderate, and severe anemia segregated by levels of care (curative strategy)

Report on Anaemia Mukut Haryana

(In collaboration with Medanta The Medicity)

Date: Monday-Tuesday, 5-6th June 2023

Venue: OPD Physiotherapy, K.R. Mangalam University.

Event Type: Anaemia screening

Mode of Activity: Offline

Target Group: Female Teaching staff/non-teaching staff & students

Resource Person: Dr. Neha Dagar, Medanta Institute of Education & Research

Coordinators: Dr. Sunil Kumar & Mr. Prashant Sharma

Organized by: Health Society, K.R. Mangalam University

Number of Participants: 120

This report outlines the collaborative efforts between Anaemia Mukut, Haryana, and the Medanta Institute of Education & Research (MIER) to address the prevalence of anemia in the region. Anemia is a significant public health concern in many parts of India, including Haryana, impacting the health and well-being of individuals, particularly women and children. Through a comprehensive approach encompassing awareness campaigns, screening programs, nutritional interventions, and medical treatments, Anaemia Mukut and MIER have made substantial progress in combating anemia in the region.

Introduction:

Anemia, characterized by a deficiency in red blood cells or hemoglobin, is a widespread health issue globally. In India, anemia affects a substantial portion of the population, with particularly high prevalence among women and children. Mukut, a region in Haryana, faces similar challenges regarding anemia, necessitating concerted efforts to address this issue.

Collaborative Initiatives: Anaemia Mukut, a local initiative aimed at tackling anemia, joined forces with the Medanta Institute of Education & Research (MIER) to implement effective strategies for combating the condition. The collaboration between Anaemia Mukut and MIER has been instrumental in devising and executing various initiatives:

Awareness Campaigns: Conducting educational programs and awareness campaigns to educate the community about the causes, symptoms, and consequences of anemia. These campaigns utilize various mediums such as workshops, seminars, and informational materials to reach a wide audience.

Registrar
K.R. Mangalam University
Sohna Road, Gurugram, (Haryana)

Screening Programs: Implementing screening programs to identify individuals affected by anemia. These screenings are conducted at local health centers, schools, and community gatherings, allowing for early detection and intervention.

Nutritional Interventions: Promoting dietary diversity and supplementation strategies to address nutritional deficiencies contributing to anemia. This includes distributing iron-rich foods, supplements, and educating individuals on the importance of balanced nutrition.

Medical Treatments: Providing access to medical treatments such as iron supplementation and other interventions as prescribed by healthcare professionals. Ensuring availability and affordability of medications are key components of this initiative.

Results and Impact: The collaborative efforts between Anaemia Mukut and MIER have yielded promising results in the fight against anemia in the region.

Key outcomes include:

Increased Awareness: Significant improvement in community awareness regarding anemia, leading to proactive seeking of screening and treatment services.

Early Detection: Early identification of anemia cases through screening programs has enabled timely interventions, preventing complications and improving health outcomes.

Improved Nutrition: Implementation of nutritional interventions has resulted in dietary improvements among individuals at risk of anemia, contributing to better overall health.

Enhanced Healthcare Access: Better access to medical treatments and healthcare services, facilitated by the collaboration, has ensured that individuals receive necessary interventions without financial barriers.

Challenges and Future Directions: Despite the progress made, challenges persist in addressing anemia comprehensively. These include sustaining community engagement, ensuring long-term adherence to nutritional interventions, and overcoming logistical hurdles in healthcare delivery. Moving forward, continued collaboration between Anaemia Mukut, MIER, and other stakeholders is crucial for sustaining and expanding initiatives aimed at combating anemia. Additionally, there is a need for ongoing research and evaluation to refine strategies and measure the impact of interventions over time.

Conclusion: The collaborative efforts between Anaemia Mukut and the Medanta Institute of Education & Research represent a promising model for addressing anemia in resource-constrained settings. By combining community engagement, medical expertise, and public health interventions, significant progress has been made in mitigating the burden of anemia in Mukut, Haryana. Sustained commitment, innovation, and collaboration will be essential in achieving lasting improvements in the health and well-being of the population affected by anemia.
