#### **KRMU-LMS- Moodle**

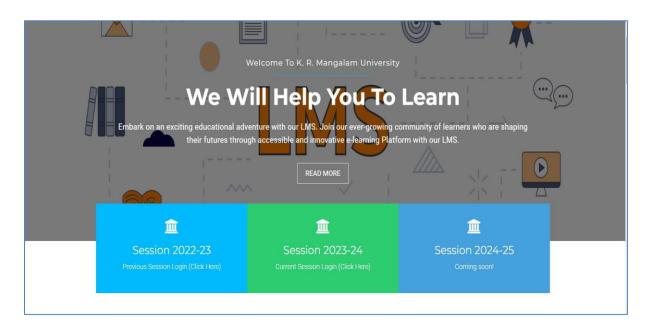

A Learning Management System (LMS) is software used by schools and institutions to manage educational courses and training programs. It helps with tasks like organizing course materials, tracking student progress, and delivering online content. Moodle is a popular free LMS that supports different types of learning, from traditional classrooms to online courses. It's used by schools, universities, and businesses to make teaching and learning easier and more effective.

K.R Mangalam University is at the forefront of technological advancement in education, introducing the Learning Management System (LMS) Moodle to facilitate the exchange of diverse content like videos, Open Educational Resources (OERs), and Electronic Self-Learning Modules (E-SLMs). The LMS is currently accessible to users, comprising both students and faculty members, who are granted personalized login credentials. Additionally, a user-friendly mobile application enables students to conveniently access the educational materials.
