ACADEMIC SESSION 2019-20

Report: "Food for Good Health" organized by the School of Medical and Allied Sciences on 26th September 2019:

Introduction: The School of Medical and Allied Sciences organized a program on "Food for Good Health" on 26th September 2019. The event was hosted by the Health Society of University and featured insightful discussions and presentations by renowned experts in the field of nutrition. Participants gained valuable knowledge about the importance of a balanced diet, essential nutrients, and dietary habits that contribute to overall well-being. Many healthcare professionals such as clinicians, dieticians, and nutraceutical experts participated and shared their experiences with the students during the seminar.

Purpose: The purpose of this report is to provide an overview of the program "Food for Good Health" organized by the School of Medical and Allied Sciences.

Methodology: The information for this report was gathered from credible sources such as the official website of the School of Medical and Allied Sciences, news articles, and press releases.

Results: The program "Food for Good Health" was organized by the School of Medical and Allied Sciences on 26th September 2019. The event was hosted by the Health Society of University and featured insightful discussions and presentations by renowned experts in the field of nutrition. Participants gained valuable knowledge about the importance of a balanced diet, essential nutrients, and dietary habits that contribute to overall well-being. Many healthcare professionals such as clinicians, dieticians, and nutraceutical experts participated and shared their experiences with the students during the seminar.

Conclusion: The program "Food for Good Health" organized by the School of Medical and Allied Sciences was an informative event that helped students learn more about healthy eating habits and nutrition.

FOOD FOR GOOD HEALTH

School of Medical and Allied Sciences organized a 'Food for Good health' competition on 26th September 2019. All the students of pharmacy participated with great zeal. The judges for the day were Dr Shreshtha Sharma and Dr Pankaj Gupta. The judgement was based on the ingredients chosen, presentation of the dish and taste.

The whole event was managed by Ms Silky Sethy, Ms Sheetal, Ms Vibha and Ms Vipula.

The event was presided by Prof Arun Garg, Dean and Prof Saahil Arora, SMAS and attended by the deans, faculty members and students of all the schools.

All the teams were awarded participation certificates and the three winners were felicitated by Dean Hotel Management

I Prize: D.Pharm, First Year for their healthy green doob lassi and fruit chat

II Prize: B.Pharm, Third Semester, Mixed fruit Yogurt and brown paneer rolls

III Prize: B.Pharm, First Semester, grilled sandwiches and dahi bhalla

THERA BANDS ACTIVITY

12th March 2020
Gurugram

An activity on "Thera Bands for Fitness" was organised on 12 March 2020 (Thursday) by the School of Medical and Allied Sciences.

These resistance bands have become an increasingly popular fitness tool amongst physiotherapists. They use it to improve strength, flexibility and endurance of muscles. It's a cost-effective workout that can be done anytime without any inconvenience.

Dr. Mamta Shankar from the Department of Physiotherapy and her students demonstrated simple exercises that can be performed using resistance bands. Around 50 students and all the faculty members of SMAS actively participated in the activity.

JmP
Registrar
K.R. Mangalam University
Sohna Road, Gurugram

Each exercise was first demonstrated and then volunteers from the audience were invited to try out the exercises with the bands.

The activity was informative, interesting and fun for the participants. One of the many benefits of regular exercise is increased and sustained energy throughout the day. This energy allows the employee to stay focused, bringing the best of themselves to each task.

WORKSHOP

REPORT

A workshop on "**Peer Pressure and FOMO (Fear of missing out) amongst the youth**" was attended by some final and pre final year students of B.Sc. (H) Physics, M.Sc. Physics and D. Pharma of K.R. Mangalam University, Gurugram on 13th March, 2020 (between 1pm to 4pm).

Here are the following details of the workshop.

Aim of the workshop: The workshop will be addresses the theme of **peer pressure and FOMO (Fear of missing out) amongst the youth**. The creative activity of needlework focuses on making the youth mindfully engage in understanding that they have their own unique path in life. Thus comparison and following the herd is not an option if we want to make our mark in the world.

Who can attend: College students who are interested in trying something new. No knowledge of needlework prior this is required.

Duration: 3 hours

Venue: Go Hive, 2nd Floor, Ocus Technopolis, Tower A, Sector 54, Gurugram, Haryana, India.

Conducted by: Ms. Swaranjali Wadhawan, LASALLE College of the Arts, Singapore. CV and details of workshop attached.

Paid / Free: Free workshop

Students attended:

1. Juhi Arya (M.Sc. Physics, IInd Sem)
2. Prabhat Kumar Bal (B.Sc. (H) Physics, VIth Sem)
3. Jitesh Sachdeva (B.Sc.(H) Physics, IVth Sem)
4. Garima Tripathi (D.Pharma, IInd Sem)

Please note: This workshop and the collective do not aim to provide therapy to students in any manner. It is an activity that purely aims at cathartic expression from the students through needlecraft.

'Staying Healthy while Staying Home'

Friday, 24 April 2020

Time: 2:00 PM

www.krmangalam.edu.in

**24 April 2020
Gurugram**

The present 'lock-down' scenario has forced many of us to change the way we live our lives, with gyms closing and outdoor activities barred, trying to curb the spread of covid-19. With an aim of keeping the faculty and students apprised of the many ways to stay physically and mentally fit during this trying time, SMAS conducted a live session on Staying Healthy While Staying Home with a renowned physiotherapist, Dr Sunaina Bajaj; working as a musculoskeletal specialist with NHS Care UK, Buckinghamshire.

Dr Sunaina shared many tips to stay active and productive during this lockdown period. She requested to have a designated

Registrar
K.R. Mangalam U.

workplace at home, preferably a standing work- station and not to work while sitting on a bed/sofa. She refrained the participants from overuse of social media. She showed the basic neck bending and stretching exercises that should be done regularly in between our hectic 'work from home' schedule. She emphasized on maintaining a correct back posture while sitting and also recommended use of a foot support. She suggested to keep a check on Vitamin D as most of us are confined to our homes these days. She recommended a minimum 30 minutes to 01-hour exercise regime every day, other than routine household chores.

The session eventually turned into an open-house discussion. Dr Sunaina sorted all the queries. It was a very informative session and benefited each one of us in a way or other.

REPORT ON THE WEBINAR

Title: **Getting Back to Work Safely – Paradigm Shift in Workforce Management post Covid-19**

Date: **8th May 2020**

Time: **2.00 pm**

Panelists: **Mr. Hemant Mendiratta, Mr. Sunny Menon, Mr. Saji Thachery and Prof. M. P. Verma**

The webinar was hosted by School of Hotel Management and Catering Technology, K. R. Mangalam University. The speakers in the panel have a very distinguished career in the field of hospitality. All of them shared their thoughts about the possible scenario after the pandemic subsides and people start going to their respective work places. All of them agreed on one point though, that the hospitality industry across the world has been hit the hardest.

The discussion started with Mr. Hemant Mendiratta who is the founder of the sales and marketing company for the luxury brand of hotels with presence in India and the middle-east. He was of the view that radical changes would be required by the hotels to survive in the long run. Most of the companies have lost almost 60% of their revenue. The marketing budgets will come down as the hotel companies will try to consolidate the revenue earnings. The new norms will be of least physical contact with the customers. Customers will now look for safety & hygiene as the most important factor to choose to stay in a particular hotel. We will see masked people at the front office when we enter the hotel. We will be able to see only the eyes of the staff members. Hotel companies have started mulling the idea of having a full time Hygiene Manager. The hotel business will be more technology driven post covid-19. The design of the restaurants and check-in process will see a dramatic change. Mr. Mendiratta said that the corporate houses have banned the travel of their executives till December 2020 unless there is extreme emergency.

The next speaker, Mr. Sunny Menon from Italy, spoke about the invisible housekeeping department which will now be the centre of attraction in terms of cleanliness of each and every part of the premises. He also shared his view that the unemployment will rise as most of the hotel companies will not be able to cope up with the pressure. Survival of the Fittest is the phrase that will fit here perfectly. He said that India faces a challenging time as the peak summer is approaching and the business houses will find it very difficult to operate. He said that in Italy, the lock down has been eased out. The coffee shops and restaurants are looking to serve the people in the open areas so as to reduce the contamination by the

Registrar

K.R. Mangalam University
Sohna Road, Gurugram, (Haryana)

customers. However, he was positive about the future and said that the people will understand the restrictions imposed upon them when they enter any eatery. He view on airlines industry was that it will take around 4-5 years for the people to start traveling extensively to other countries. The tourism will have to survive on the domestic tourists for the coming few years. He said that the rooms of the hotels will have to be redesigned.

Mr. Saji Thachery, who is the General Manager of The Gateway Hotel, Nashik (Taj Group of Hotels) also shared his views on what the hotels would need to do to survive. As per him, all the hotel companies are now framing new SOPs to counter the new scenarios that have come up in the last few months. The companies have literally zero income in the last 5-6 weeks because of the lock down. Since he is into the operations of the hotel, he was of the view that big fat weddings, huge conferences may be the thing of past. He said that if the companies have to survive the companies will have to adapt to the new changes and the ones who will not adapt may not last for a long time. Hotels will have to take the drastic steps to suit the requirements of the guests as well as govt. regulations. Employees will have to embrace the new working conditions as they will not be the same as they were before lock down. Employee-Employer relationship will have to be more trust worthy than before. The staffing will reduce to compensate with the bottom line. The hotels will now look out to rent their rooms to the corporate houses as they fear that the occupancy will not peak in the coming few years.

The lat speaker of the discussion was Prof. M. P. Verma. His thoughts were more on the academic side of the hospitality sector. He said that the concept of online classes has come up very fast post the lock down and this may be the future of education. The digital mode adopted by all the educational institutions shows that this may become the only mode of interaction with the students. Virtual work experience was quite new to all of us as no one thought we could have a panel discussion of this sort.

School of Medical and Allied Sciences, K.R. Mangalam University organized a webinar on 'PHYSICAL AND MENTAL HEALTH DURING LOCKDOWN' on 11th May 2020.

The resource persons were Dr Mamta Shankar, Physiotherapist, SMAS, KRMU and Dr Rupali Chandola, Department of Psychology, SOHS, KRMU.

Dr Mamta emphasized on not neglecting physical health while working from home. She demonstrated a few exercises to combat the stiffness induced by overworking on computers. She insisted on maintaining a regular fitness regime by doing 'exercise of choice' in between the hectic work-from-home schedule. The exercise can vary from aerobics, yoga, climbing stairs or exercise using simple equipment like Thera bands. She also explained the 'Tech-Neck' issue; the stiff and painful neck that arises because of long seating in front of computers, and wrong postures. She shared her magical chin-tuck exercise to counter the

Registrar

K.R. Mangalam University
Sector Road, Gurugram, (Haryana)

same.

Dr Rupali briefed the audience about the components of mental health. She said in the present time of uncertainty, the fear of unknown has made many of us anxious and mentally unfit. To evade the negative thoughts, she suggested 'emotional binging', that is taking a break and eating something of choice, may be a fruit, a biscuit or anything else.

She suggested creative work like painting, singing or sketching, and taking short breaks to play with pets as great stress busters. She requested to write a daily diary to vent out negative thoughts and stress. An audience poll was conducted. According to the results 63% of people exercise only for 15-30 minutes a day and none beyond one hour. More than 50% of the audience found media affecting their way of thinking in a way or other. The session was very informative and gave a new insight towards managing routine during the lock-down period.

Mamta Shankar.

Webinar on Technical Insights Solution to COVID-19

19 May 2020

Gurugram

School of Engineering and Technology conducted a webinar on "Technical insight solutions to COVID 19" on 19th May 2020. The session was conducted by students and faculty members who are working on CIVID-19 Project. The Webinar started with a welcome note by Ms. Charu Singh, Assistant Professor, School of Engineering and Technology. She gave an overview of technical aspects that would discussed in the webinar like e-yantra, Disaster management and Computer society of India.

The e-Yantra, project born out of IIT-Bombay Computer Science teaching practice, uses a homegrown robot to train students and teachers in Project Based Learning and motivates students through a National e-Yantra Ideas Competition (eYIC) to grow and promote an ecosystem by setting up infrastructure and training teachers in colleges, universities and neighboring countries like Bhutan through the e-Yantra Lab Setup Initiative (eLSI), and crafting centers of innovation to encourage interdisciplinary skills and hands on training. The e-Yantra encourages hands-on projects through "Project Based Learning methodology" and to help students in implementing applications on the robot in a step-by-step manner, guiding them through various steps in the project implementation life cycle. A new e-Yantra Robotic Lab in collaboration with IIT Bombay, Ministry of Human Resources Development (MHRD), by Government of India has been set up and inaugurated on 30th July, 2019 at K.R. Mangalam University, Gurgaon.

The webinar continued with a knowledge sharing discussion on Portrayal of COVID-19 as Epidemic/Disaster management plan for homeless by Kewal Gupta student of B.Tech (Civil) II Year. In this project, the students of different schools of university worked on those countries which were majorly affected due to COVID-19 and their policies regarding homeless. They worked for China, Spain, India, Germany, USA, UK, France, Brazil, Italy and Israel. Due to corona virus, almost every country declared lockdown. They prepared temporary shelters to serve homeless during this pandemic. They converted their hotels, motels, inns, resorts, lodges, schools, colleges, hostels, sports complexes, night shelters, charity shelters and religious place into temporary shelters and quarantine centers and even prepared tents.

The SOET, KRMU has an institutional membership of Computer Society of India. Ms. Divisha Jain, a student of CSE IV semester elaborated the usefulness of CSI membership while working for COVID-19 project under the supervision of few
