(57) Abstract :

The artificial intelligence based automatic file vending machine (100) for human resource practice. The artificial intelligence based automatic file vending machine (100) for human resource practice consists of a user-friendly interface, AI processing unit, plurality of IoT sensors and document storage unit. The user-friendly interface is configured to facilitate interaction with users. The AI processing unit configured to analyze user data and provide personalized document recommendations. The plurality of IoT sensors is used for collecting real-time data for user interaction tracking. The document storage unit that allow categorization and easy retrieval of HR-related materials. The artificial intelligence based automatic file vending machine (100) for human resource has been explored to ensures a synchronized ecosystem wherein updates, modifications, and document additions seamlessly propagate across the organization
