KR Mangalam University already has excellent facilities, but to further enhance its reputation and student experience, it can focus on several key areas. First, strengthening industry connections by offering more internships, workshops, and expert lectures will help students gain practical exposure. Second, improving faculty training programs and introducing more interactive, research-based teaching methods can boost academic excellence. Additionally, fostering a stronger student community through clubs, cultural fests, and leadership programs can create a more engaging campus environment. Personalized career counseling, entrepreneurship support, and advanced digital learning tools will also add value. Lastly, focusing on sustainability initiatives and mental health support can improve the overall well-being of students. By implementing these strategies, the university can become a top choice for students looking for holistic growth.

Too much pressure on students since every faculty only focus on their on subject and don't think about students at all. All they need is their work despite of what student goes through. There is minimum understanding about the timelines and then students are pressurized to do a lot of work at same time.

Suggestions

Please give suggestions, if any. *

Im not happy with the inconvenience you make for students. Straight 5 lectures for same subject. Poor canteen facility. Need to provide more practical knowledge for this field.

Parents can suggest enhancing K.R. Mangalam University by focusing on emphasising practical learning, industry exposure, and holistic development for their child. They may suggest additional internships, industry collaborations, and skill-based courses to help students bridge the gap between academics and real-world applications. Encouraging personalised mentorship, career counselling, and interactive teaching approaches can improve student learning.

the third year students are told that they are going to have their exams in the last days of April 2025? This is complete non sense as they need time to actually understand the concepts and not just cram them . We have given the fees till June 🤦‍♀️ then why didn't you ask for fees till April only .

Suggestions

Please give suggestions, if any. *

Placement guaranteed is not provided. MBA Student must be provided with placement, not internship with good package that was promised during admission. JD is not provided for any job profile. HR profile provided is very few and with less stipend and low package. Only 1 month is left still we didn't get any placement. Intership experience is not counted if we try own our own and at least subjects must be kept very few for final year students so that if they get any opportunities, they will not loose that because of 15-20 days leave during exam and attendence must not be considered for final semester students.

My ward was eligible for 17.5% of scholarship money. The same has not been given due to error in Academia software error which showing attendance 0% for 2 subjects of 1st semester. All subject teachers confirm through email about the regular presence of my ward in classes. Regarding this an application has been submitted in which the Dean of SOMC put up remarks "scholarship money to be refunded" but still no action has been taken nor confirm through email or in writing. I have personally met with the registrar and he assured that he will contact in my mobile but never come back. Necessary direction may be given to the registrar for immediate action of the application of my ward.

Educationally, this university is very very poor. Frequency of facauties quitting from the university is very high. Resulting very low bonding or connection between teacher and students...

University should take feedback from the students secretly about the teacher's ability of teaching, then only quality of education could be improved.
Most of the times teacher (most of the teachers)doesn't teach properly. When we tried to show our concerns, teachers took grudges on the students , which is very unfortunate.

Is there any platform where parents can complain / show concern about the teacher/ exams process/ or even any education related issues?

Thank you for your participation in the survey.

As a parent, experience is not good regarding studies. Communication between the university & students regarding any issue is poor. Frequent changes of faculties & Dean. Considering overall 3yrs, experience is not good regarding some of the faculties behaviour towards the student, teaching also not good, communication also poor. It's sad that when parent complain about any issue, though the student is good in studies still some of the faculties take grudges by giving poor marks to the student. There are many things to suggest & this is the first time we got this feedback form to fill up. I would suggest to the university to look at these matters, so that the students can be comfortable in studying, communicating with faculties & management of this university without being afraid & in stress. In a nutshell, at the time of admission, whatever said to us regarding the facilities for the students is almost not seen in this university. It's really disappointing to us.

Thank you for your participation in the survey.

Kindly work on the commitment, university offered at the time of admission and continually repeating it in every new admission still that curriculum includes classes for the preparation of various competitive examinations along with all the basic information.
University has not started even the first alphabet of the same practice.
I expect University to work on this as it would definitely make u different and unique among all persisting organisations and also it would help students to rise high in order to brighten the university's fame.

Suggestions

Please give suggestions, if any. *

It is crucial to promote gender equality and educate men on respecting women as a fundamental principle, not an option. People should be taught human behavior, not to act like wild animals. Additionally, there should be more placement opportunities, especially for applied psychology students, to ensure their skills are put to practical use.
