RESEARCH AND METHODOLOGY- Workshop” (18 July 2022)-Resource Person: Dr Kaushal Kumar

Overview

The Research and Methodology workshop aimed at enhancing participants' understanding of effective research practices and methodologies. It targeted faculty members and advanced students engaged in research activities, focusing on rigorous approaches to academic and scientific inquiry.

Objectives

- To provide comprehensive knowledge of research methodologies, emphasizing both qualitative and quantitative approaches.
- To train participants in developing sound research proposals, literature reviews, and data collection techniques.
- To facilitate skill development in technical writing, data management, and research dissemination.

Workshop Content and Key Topics

- Distinction between research methods and methodology, explaining their appropriate usage.
- Strategies for effective literature review: how to synthesize existing research and organize sources.
- Designing research: rationale behind methodological choices, selection of qualitative or quantitative methods.
- Data collection methods and organizing research data for optimal reuse and sharing.
- Technical writing skills, including usage of language tools and introduction to LaTeX typesetting for preparing manuscripts, reports, and theses.
- Review processes: manuscript submission, responding to reviewers' comments, and bibliography management tools like Mendeley and JabRef.
- Use of online tools and platforms to facilitate research documentation and collaboration.
- Emphasis on the ethical, systematic approach to research and publication.

Outcomes

- Enhanced capability of faculty and students to design and conduct systematic research.

- Improved proficiency in research documentation and academic writing.
- Prepared participants for efficient manuscript preparation and publication.
- Raised awareness about data management best practices and research integrity.

Conclusion

The workshop successfully equipped participants with essential skills and knowledge for conducting high-quality research. Under the guidance of Dr. Kaushal Kumar, it enabled participants to adopt best practices in research methodology, improving their research outcomes and academic contributions
