REPORT
on
"Empowering Educators through AR/VR – A Faculty Development Program"

1. Introduction

The Faculty Development Program (FDP), jointly conducted by **KR Mangalam University** and **ImaginXP | CollegeDekho**, was designed to equip educators across disciplines with foundational and advanced knowledge of **Augmented Reality (AR)** and **Virtual Reality (VR)**. The week-long program, held from **June 2 to June 7, 2025**, focused on the pedagogical integration of immersive technologies in education, enabling faculty to innovate in their teaching approaches and curriculum design.

Program Highlights:

- **Day 1** introduced participants to the program objectives, followed by an in-depth session on the **fundamentals of AR and VR** technologies. Participants explored the theoretical concepts, real-world use cases, and the evolving landscape of immersive learning. Hands-on assignments helped in reinforcing key ideas.
- **Day 2** focused on **AR/VR applications in education and training**, showcasing how immersive tools can enhance engagement and retention in learning environments. The day also included practical sessions to initiate content creation workflows in AR/VR platforms.
- **Day 3** expanded into the realm of **AR/VR applications in engineering and design**, with emphasis on simulation-based learning, interactive prototyping, and design visualization. Experts highlighted case studies relevant to both academia and industry.
- **Day 4** was dedicated to the **gaming and entertainment industry**, covering how AR/VR technologies revolutionize storytelling, user interaction, and immersive game development. Technical demonstrations helped participants experience these shifts first-hand.
- **Day 5** addressed the **business and industrial applications** of AR/VR, including virtual showrooms, training modules, and remote collaboration. It showcased how enterprises are leveraging immersive tech for innovation and productivity.
- **Day 6**, the final day, concluded the FDP with **capstone project presentations** by participants. Faculty members shared their AR/VR-enabled teaching concepts and received constructive feedback from industry experts and academic peers.

Throughout the FDP, sessions were delivered by **industry professionals and academic experts**, with dedicated slots for assignments and interactive discussions. The program offered a balance of theoretical knowledge, real-world insights, and practical implementation.

2. Day-wise Report of the Sessions Conducted

A. Monday, 2nd June 2025

The first day of the FDP commenced with an introduction outlining the goals, structure, and expected outcomes of the program. Participants were familiarized with the relevance of immersive technologies in education. Following this, sessions delved into the foundational concepts of Augmented Reality (AR) and Virtual Reality (VR), highlighting their differences, underlying technologies, and real-world significance. The session on AR/VR applications showcased their transformative potential in educational settings, demonstrating how immersive environments enhance engagement, retention, and understanding. The afternoon was dedicated to practical exploration. Faculty engaged in a hands-on workshop where they tested various AR applications designed for classroom integration. The day concluded with a VR tools demonstration, exposing participants to platforms used in engineering, design, and life sciences education. The FDP concluded with a valedictory session celebrating the participants' engagement, feedback collection, and the announcement of digital certificate distribution. This initiative exemplified SOAD's commitment to integrating emerging technologies in design education, fostering innovation, and nurturing academic excellence through interdisciplinary approaches.

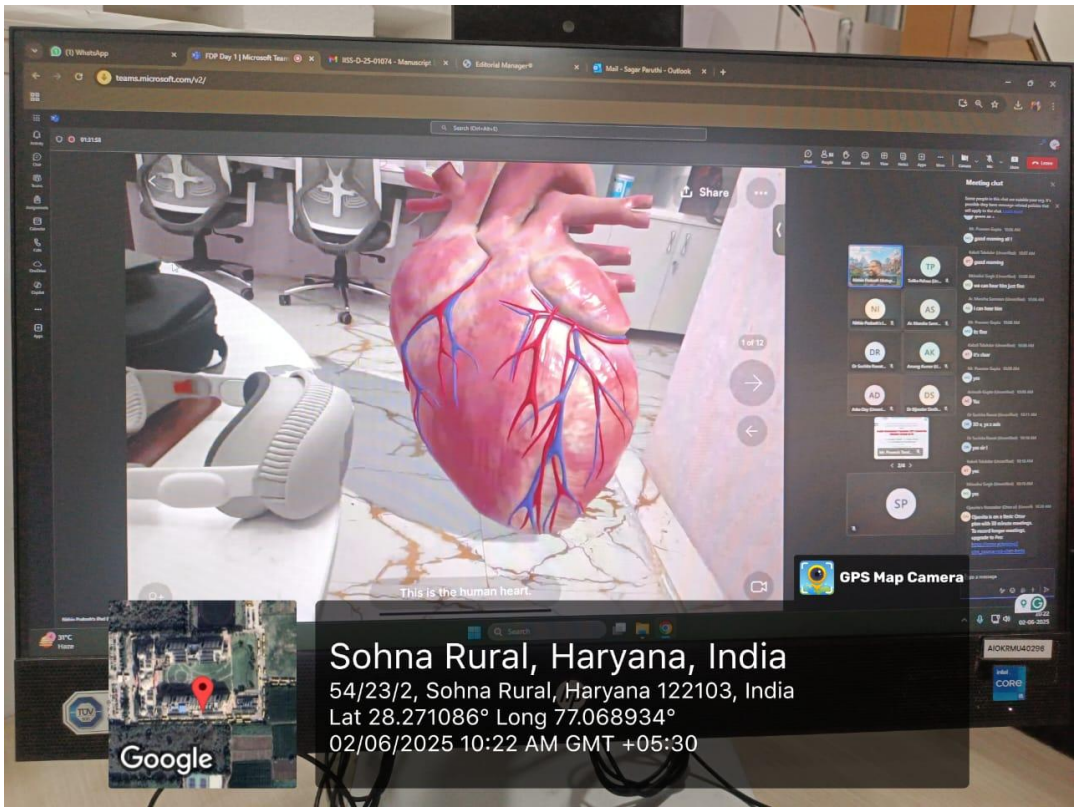

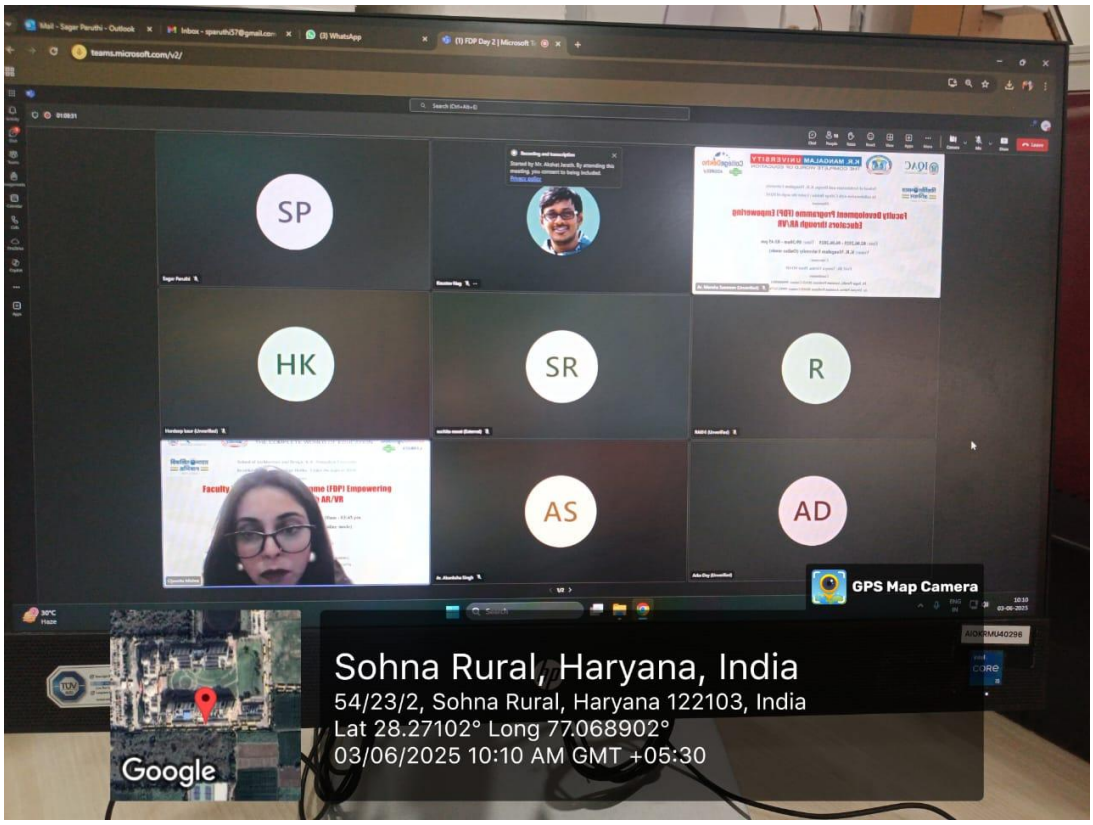

Photo 2: Day 1 sessions images

B. Tuesday, 3rd June 2025

Day 2 began with an interactive session on applying design thinking methodologies to structure immersive educational experiences. Participants explored user-centric approaches to instructional design, essential for meaningful AR/VR integration. This was followed by a focused exploration of AR/VR applications in STEM and engineering education. The session presented simulations, virtual labs, and real-time 3D modeling, demonstrating how immersive tools bridge the gap between theory and practice. Later, faculty were introduced to real-life case studies of AR/VR implementation in schools and universities across domains. These practical insights helped identify best practices and challenges. The day wrapped up with an activity session where participants experimented with basic AR creation tools, enabling them to develop simple but effective AR content for their disciplines.

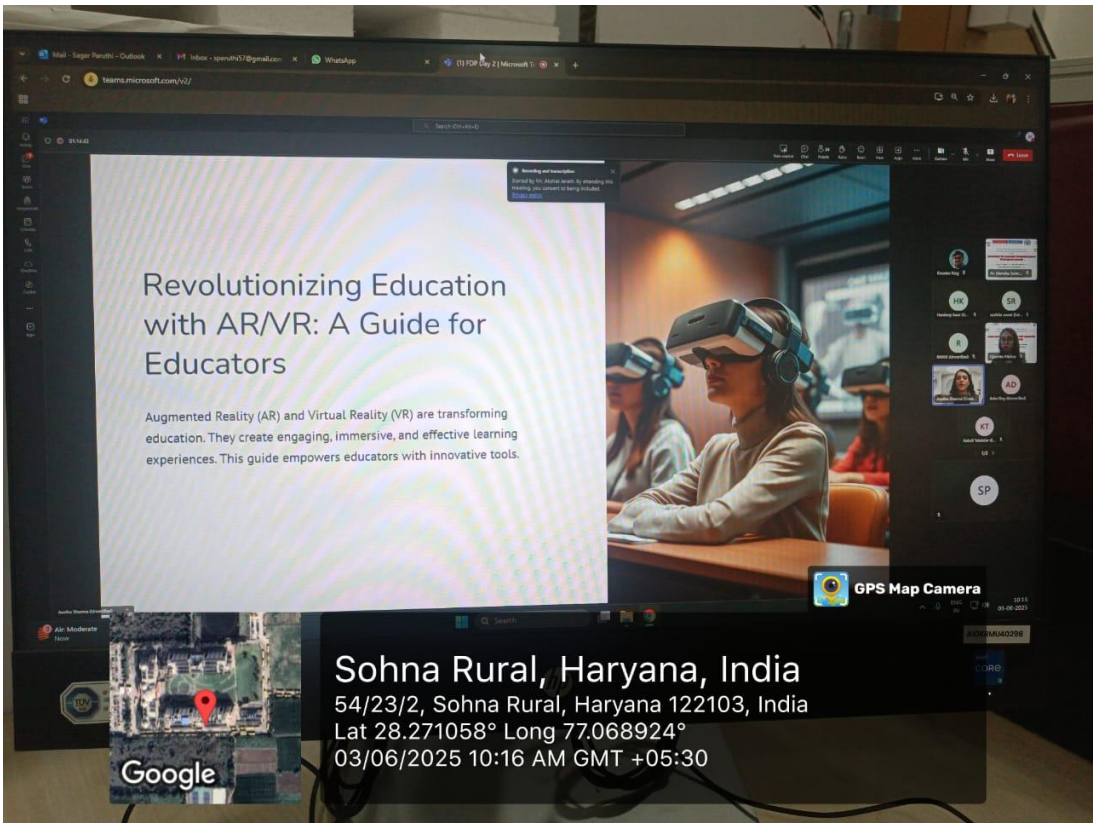

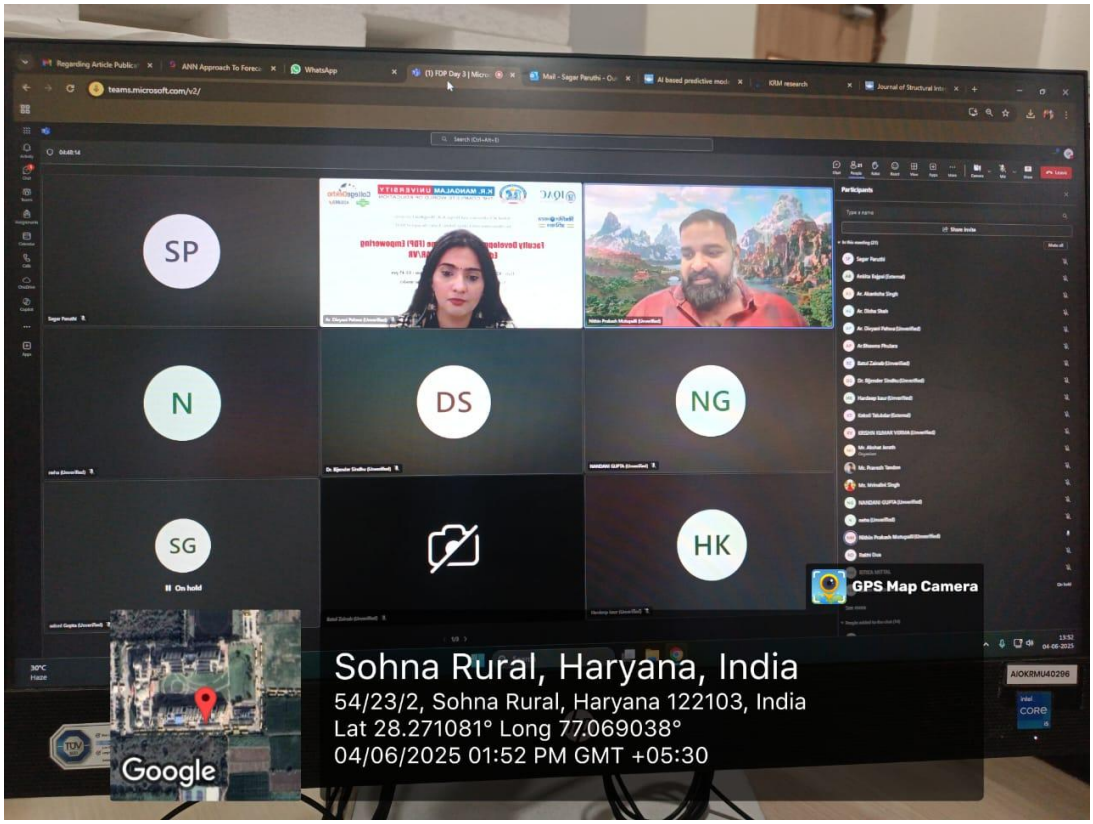

Photo 3 & 4: Day 2 Sessions Images

C. Wednesday, 4th June 2025

The third day emphasized the pedagogical changes needed when integrating immersive technology into teaching. Discussions centered around student-centered learning, experiential learning models, and the role of instructors in a virtual environment. An overview of popular AR/VR content creation platforms (such as Unity, CoSpaces, and ZapWorks) provided participants with the knowledge needed to begin developing their own digital content.
A live demonstration of Unity, a leading VR development platform, showcased how to build 3D virtual environments. The session covered interface navigation, object manipulation, and basic scripting. In the final session, faculty took part in an interactive lab where they practiced publishing their AR/VR projects. This helped demystify the workflow from design to deployment, making the technology more accessible for educators.

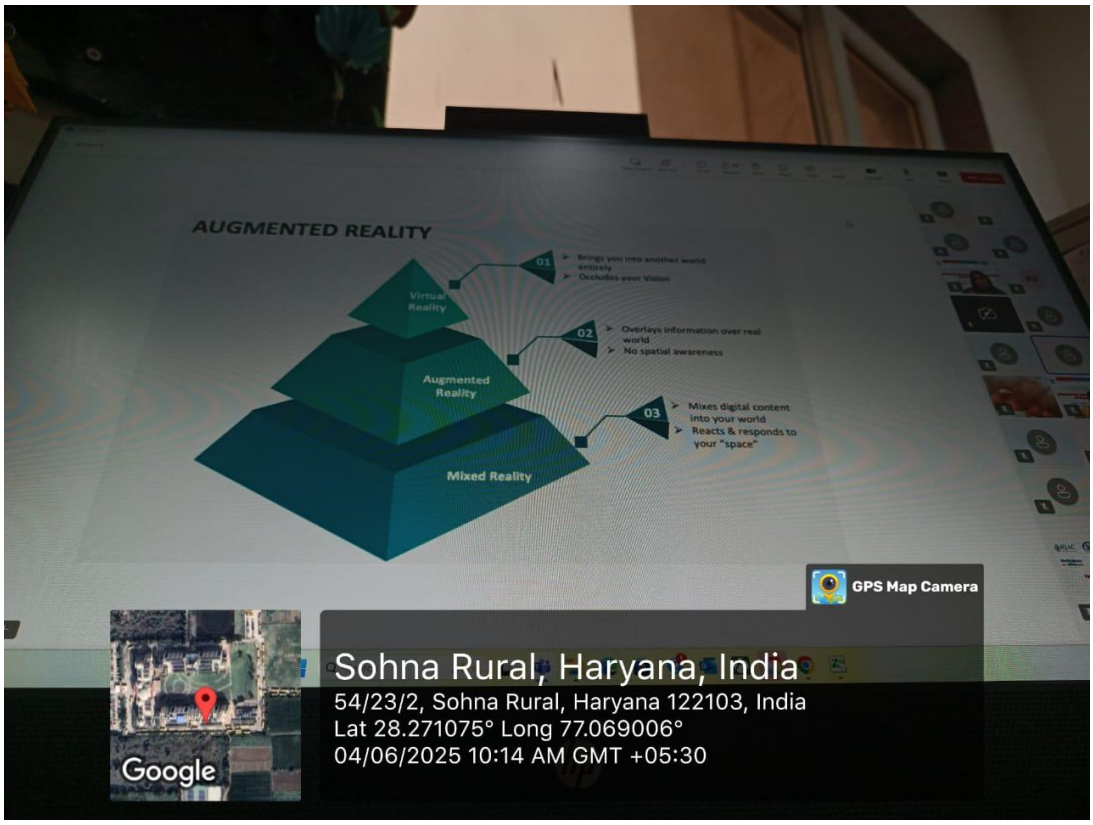

Photo 5 & 6: Day 3 Sessions Images

D. **Thursday, 5th June 2025**

Day 4 focused on the broader picture, preparing institutions for AR/VR adoption. Speakers outlined key considerations such as infrastructure, faculty training, content availability, and policy frameworks. This was followed by a critical discussion on ethical considerations, including data privacy, digital equity, over-immersion risks, and accessibility concerns. These discussions helped attendees develop a balanced approach to integrating AR/VR responsibly. An interdisciplinary panel featured faculty from engineering, humanities, business, and science backgrounds, discussing how AR/VR can be customized to suit each domain's needs. To cap the day, participants began planning their own course modules integrating AR/VR. Guidance was provided on learning objectives, content mapping, tool selection, and evaluation strategies.

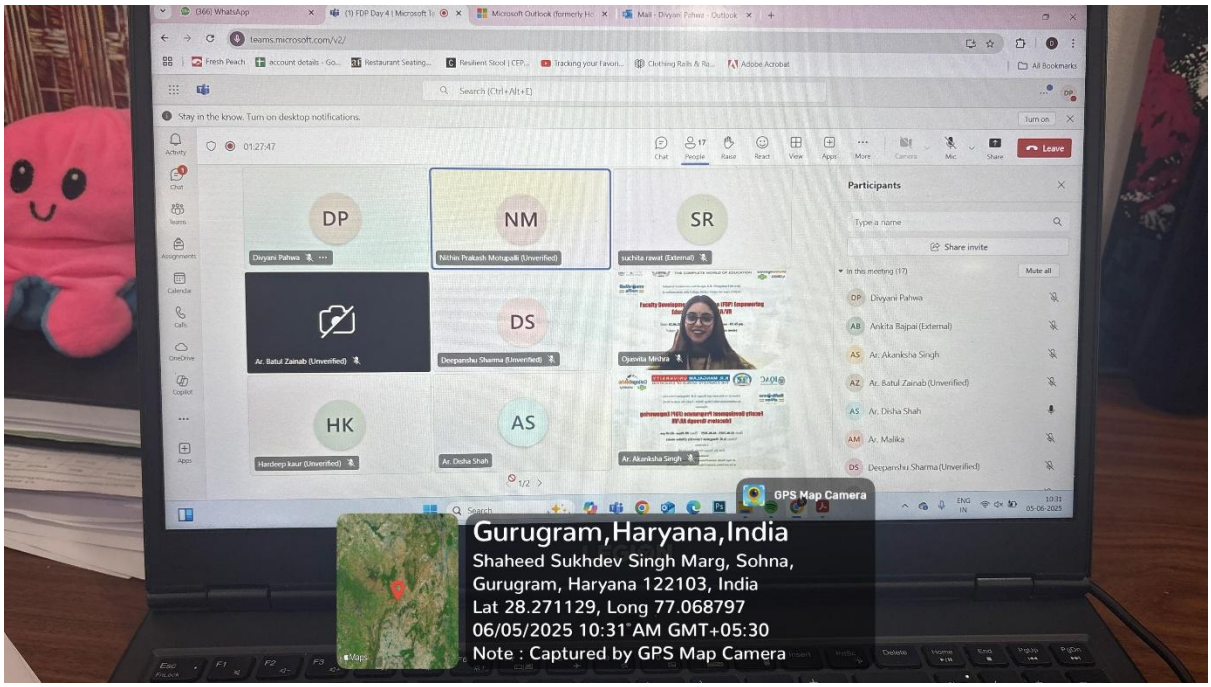

Photo 7: Day 4 Session Image

E. Friday, 6th June 2025

The final day began with a discussion on assessment frameworks suitable for AR/VR-enabled learning. This included performance-based assessments, simulations, and learning analytics. Faculty participants then presented their mini AR/VR projects, developed over the course of the FDP. The showcase demonstrated creative and practical use-cases across disciplines, reflecting the program's success in skill-building. An open feedback and reflection session allowed participants to share their experiences, insights gained, and future implementation plans. The FDP concluded with a valedictory session, where dignitaries acknowledged the participants' efforts and distributed certificates of participation.
