How to: Store white shirts to prevent discoloration over time

WASH THE SHIRTS BEFORE YOU STORE

Always store your white shirts clean. Even invisible traces of sweat, perfume, or body oils can oxidize and cause yellowing over time. Use a gentle detergent and avoid fabric softeners - they can leave residues that attract dust.

CHOOSE THE RIGHT SPOT FOR STORAGE

Pick a cool, dry, and dark place for storage. Sunlight and heat can turn whites yellow, while humidity encourages mold. Avoid keeping them near bathrooms or windows.

USE BREATHABLE STORAGE

Skip plastic covers. Instead, use cotton garment bags or wrap your shirts in acid-free tissue paper. Breathable materials allow air circulation.

STORE FLAT

Use wide, padded hangers to prevent shoulder bumps. For folding, interleave with white tissue paper to reduce friction and creasing.

AVOID CONTACT WITH WOOD OR METAL

Natural wood hangers or metal clips can transfer

tannins or rust. If using wooden hangers, ensure they're wrapped in fabric.

ADD NATURAL FRESHENERS

Slip a few silica gel packets, cedar blocks, or lavender sachets nearby to absorb moisture and keep insects away.
